

November 15, 2017

Dear Supervisor Lovato and other selected Plumas NF employees,

The Bullards Bar scoping document indicates glyphosate will be applied to eradicate to Scotch broom.

Who are you people? Most Californians know Roundup causes cancer. You should too. Do you enjoy killing people?

I suggest you read the *Feather River Bulletin* newspaper. I will write a guest editorial warning the public not to visit the Plumas National Forest because they could expose themselves to the chemical carcinogen glyphosate if your DEIS or pre-decisional EA still proposes to apply glyphosate. Of course the editors will print it because it is a life or death matter. My guest editorial will inform them to call the Miller Law firm trial lawyers at 877-303-8683 if they knew of someone who was afflicted by the blood cancer non-Hodgkin's lymphoma after visiting the Plumas National Forest. You should call this number to validate it.

Please don't apply a chemical banned for use in California because the chemical causes cancer ... even if your employer (the USDA in this case) says the chemical is safe. If you don't believe me open the following link.

Consider this:

California says key ingredient in Roundup weed killer can cause cancer

Published by CNN, June 29, 2017

Excerpt:

“(CNN) One of the most popular herbicides in the world can cause cancer, California health officials say, and they might demand warnings saying so.

That herbicide, glyphosate, will be added to [California's list of chemicals that can cause cancer](#), the state's Office of Environmental Health Hazard Assessment said this week. Glyphosate is the key ingredient in weed killers such as Roundup.”

California declares glyphosate weed killer (Roundup) to be a cancer-causing poison; will add to Proposition 65 warning list

Published by *Natural News*, June 26, 2017

Excerpt:

“In a significant victory for consumer safety — and a devastating blow to Monsanto — [California's Office of Environmental Health Hazard Assessment \(OEHHA\)](#) has declared that [glyphosate weed killer](#) is a known, cancer-causing carcinogen that will be added to the scope of Proposition 65.

[Glyphosate weed killer](#), also sold under the Roundup brand name by Monsanto, is identified by California under CAS #107-83-6, which lists “cancer” as a known endpoint, and invokes “LC” (Labor Code) as the justification for the categorization.”
